

ATTENTION
RISING 6TH GRADE PARENTS:

It is now required that all rising 6th graders must have a T-dap vaccine before starting their first day of school. If it has been five years since your child received a tetanus-containing vaccine, he/she will need a dose of T-dap. If it has been less than five years, talk to your child's doctor about the need to receive a dose of T-dap.

Please be prepared to provide proof of this vaccination along with your *Children's Medical Report Form* before the first day of school.
